PROJECTS

Fresh City NY — Directory (June 2018 to Present)

<http://www.freshcityny.com/>

- Provides users the only listings of free & affordable showers within New York City to keep fellow citizens informed, healthy, and fresh. Designed to be as inclusive and considerate of users of a varying literacy and fluency in languages, economic status, and ability.
- Can instantly translate into *5 languages* (the most prominently used within NYC) and uses *google maps api* to provide a visual representation each location, that instantly translates depending on the user selection as well. Has *API integration (REST, JSON)* for other users to use for their projects: <http://www.freshcityny.com/api/sites>
- Built with *Ruby On Rails*, and *Ruby Gem Devise* for secure administrator access. Admins can create, update, and delete shower locations and information. Uses *PostgreSQL* for data, *SCSS* for styling, *Bootstrap* for responsiveness, and *Heroku* for deployment & hosting.

Alfonso Arriola — Portfolio site (July 2016 to Present)

<http://alfonsoarriola.com/>

- A collection of *10+ deployed projects (front-end & back-end)*, using a variety of languages and design principles. Uses *Mailchimp* to manage data and send automated, custom designed, email response.
- Designed and coded myself, *Bootstrap* for responsiveness, *FileZilla* for File Transfer Protocol, *Inmotion* for deployment & hosting.

SKILLS

HTML5, CSS3,
JavaScript(ES6),
ECMAScript,
TypeScript, NPM,
Jquery, PostgreSQL,
Node.js, Angular.js,
Active Record, Git,
Github, SCSS/ SASS,
Bootstrap4, Java,
Heroku, Ruby, Ruby
on Rails, Materialize,
Sinatra, Postico,
AJAX, Active Record,
React.jsx, Angular 7,
Python, Node.js,
Postman, inmotion,
Filezilla, Google
Maps, Google
Analytics, Mailchimp,
Amazon Web Services
(AWS), Object
Oriented
Programming

EDUCATION

The New York Code &
Design Academy

Fordham University
